The simplest way
...to get your vitamin D!

Did you know:

- Our bodies make vitamin D when skin is exposed to sunlight?
- We need vitamin D as well as calcium to maintain good health, in particular to keep our bones and muscles fit and strong?
- Sun protection is required when UV levels are 3 and above?

Does sunscreen stop vitamin D?

- Sunscreen filters out most, but not all UV radiation.
- People who use sunscreen regularly (when UV levels are 3 and above) don’t have lower vitamin D levels than people who do not use sunscreen.
